

Paper Sourcing Policy

UK Greetings are proud to offer paper based products to the UK market place and we take our paper sourcing responsibility to protect the environment seriously.

We operate stringent sourcing policies that comply with applicable law, including the EU timber regulations (EUTR) and Forest Stewardship Council (FSC) which is widely respected as having one of the most robust forest certification programs in place to ensure ethical sourcing of paper products.

Our range of innovative and diverse product requires us to source paper from various suppliers, recognizing differing certification programs. Our aim is to source all paper used in our finished products from sustainable forests which has been certified to a high standard governed by an auditable chain of supply.

Any materials that do not comply with EUTR legislation do not form part of our portfolio. All paper is legally sourced and we operate a full chain of custody record of source, species and country of origin. Our paper grades and suppliers are reviewed annually to ensure we continue to source materials from sustainable, compliant sources and we continue to strive to ensure the ethical sourcing of our timber products meet the highest environmental standards.

In 2019 100% of orders raised by UKG utilized FSC or SFI certified paper stocks and in excess of 10% of orders raised were manufactured with the third party accreditation FSC logo on the product.

Please refer to our EUTR Policy and Compliance Procedures for more information on how we manage and source our paper.
